# SUPERIOR INTEGRATION

## PRO PRO HEAVY DUTY SERIES WINCHES

### ✓ Pre-wired chassis & no need to cut panels

Factory-installed wiring makes the controls simple to install. Mount the winch, connect the wires and trust that everything is routed safely, securely, and properly.

- ✓ Tested 1,200+ pulls at max load
- ✓ Built to withstand -20° F temperatures
- ✓ Operates fully submerged underwater
- ✓ Military tested and approved

### 1 Sealed permanent magnet motor

### 2 Cut steel gears and sealed drivetrain

### 3 PREMIUM SYNTHETIC ROPE

With its lightweight, yet extremely strong, design and superior flexibility, this 50 ft. long synthetic rope is easy to handle and can stand up to any tough job.

### 4 RAPID ROPE RECOVERY 5X FASTER

Retrieve cable 5x faster than standard mode on other Polaris winches. Get back to riding or complete your task quicker.

### 5 AUTO STOP TECHNOLOGY

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

### ✓ WIRELESS REMOTE

This convenient remote operates your Polaris winch wirelessly from within 50 ft. of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.

It's tough to make Sportsman even more versatile than it already is. But with a set of Prospector Pro Tracks, you'll do just that. Tread through deep snow without concern.

PROSPECTOR PRO 2.0  
TRACK SYSTEM

- A** New front dual stabilizer for improved stability
- B** Polaris-specific gearing provides 1:1 ratio to:

  - Minimize track slip, providing better climbing ability and improved traction in deep snow
  - Improve top speed over prior models by approximately 5%
  - Reduce operating RPM for a quieter ride
  - Improve driveline durability, which allows vehicle to run at a lower RPM, decreasing engine wear
- C** Polaris exclusive optimized hub geometry that minimizes feedback and eases steering effort
- D** Lightweight design provides for better flotation, eases steering effort, and provides better vehicle control
- E** Flexible lug design provides the highest level of deep snow performance by lifting up in deep snow as opposed to digging down

# MAINTENANCE & GARAGE

**FACTORY APPROVED.** Every Polaris vehicle has been engineered and manufactured to deliver performance. Keep it that way by using the same lubricants, cleaners and service parts our factory-trained technicians use.

FOR THE LIFE OF YOUR RIDE

PUSH THE LIMITS WITHOUT SACRIFICING STRENGTH, LONGEVITY AND DURABILITY. Polaris parts are engineered specifically for your machine, to ensure you get the most out of each ride.

MAINTENANCE TIP

BREAK-IN PERIOD

The break-in period for your new Sportsman is the first 25 hours of operation, or the time it takes to use the first two tanks of fuel. No single action on your part is as important as a proper break-in period. Careful treatment of a new engine will result in more efficient performance and longer life for the engine.

NOTICE: Excessive heat build-up during the first three hours of operation will damage close-fitted engine parts. Do not operate at full throttle or high speeds for extended periods during the first three hours of use.

SEE OUR LATEST MAINTENANCE TIPS AT [ATV.POLARIS.COM/EN-US/SELF-HELP](http://ATV.POLARIS.COM/EN-US/SELF-HELP)

BATTERY

To ensure a battery maintains its level of charge when unused for extended periods of time or during freezing weather, the battery should be connected to a battery charger (see P. 65). Be sure to check for corrosion from the terminals to the ends of the cables.

BRAKE PADS

Brake pads should be checked for wear and oil or grease (petroleum products) contamination. Brake discs should be checked for cracks, excessive corrosion or warping.

HALF SHAFTS

Check for tears and punctures in the boot, which can lead to CV joint wear that can contribute to axle failure.

AIR FILTER

A clogged air filter can restrict air flow to the engine which can lead to reduced engine performance and shortened engine life.

DRIVE BELT

Polaris Engineered belts deliver unmatched performance for your off-road vehicle. Developed and tested on all our engines for all environments and conditions. Check your belt for delamination, hour glassing and glazing.

OUR INVESTMENT

- 40,000+ miles / 64,000+ km of field testing
- Thousands of dyno hours
- 18+ months of development (13,000+ design hours) per belt
- 1,500+ vehicle validation hours
- Collaboration with powertrain and clutch engineers

YOUR ADVANTAGE

- No clutch recalibration
- Less wear and tear due to heat
- Ensure maximum vehicle performance
- More time riding, less time wrenching
- Produced in collaboration with powertrain and clutch engineers to ensure a perfect fit, maximum performance and ultimate durability

BREAK-IN PERIOD

- Use lower gear (if available) while varying speeds and avoid wide open throttle for 5-10 miles / 8-16 km
- If no low gear is available, vary at moderate speeds while avoiding wide open throttle for 50 miles / 80 km

OIL FILTER

Change oil filters with every oil change to provide the best engine protection and keep the engine operating at peak performance.

POLARIS  
EXTREME  
SYNTHETICS

PS-4 EXTREME SYNTHETIC 0W-50

- Our best extreme high and low temp formula, excellent for high temperatures and racing, even at temps of 130°F, plus easier cold starting even below -45°F
- Expect the best in wear protection thanks to premium PAO and ester base stocks combined with a balance of moly and ZDDP additives
- Polaris exclusive clean engine additive system reduces deposits and carbon build-up for peak performance and power

THE BEST PROTECTION,  
MAXIMUM PERFORMANCE

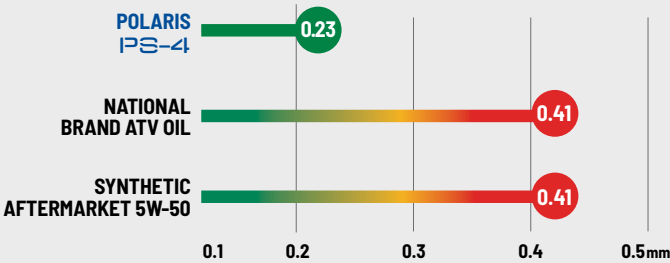

- Powersports grade full synthetics provide long lasting engine protection
- At least 40% improved wear protection compared to all aftermarket oils tested (see engine wear test chart)
- Polaris exclusive clean additive system
- At least 50% less deposits than all aftermarket oils tested (see deposit test chart)
- Cleaner engine with less deposits means consistent maximum power and performance

WIDEST VISCOSITY FOR ULTIMATE PROTECTION

ENGINE WEAR TEST

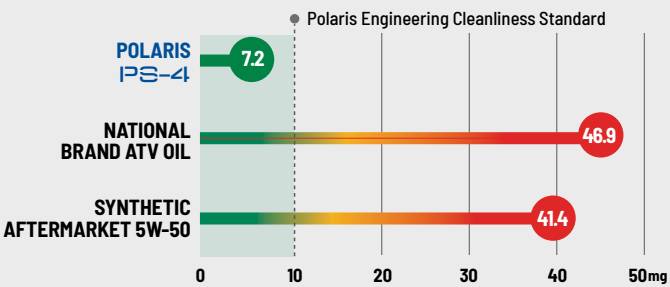

LOWER NUMBER = LESS ENGINE COMPONENT WEAR  
LESS WEAR ON PARTS MEANS LONGER ENGINE LIFE

ASTM D4172. In 3rd party testing against 9 competitive products Polaris had 40% or better wear protection compared to all of the tested products. Numbers represent mm of wear scarring measured. Test measures wear at contact points, wear scar is measured for its length and width (in units of mm). Lower wear numbers mean better wear protection and friction reduction.

DEPOSIT TEST

LOWER DEPOSITS = MAXIMUM POWER

ASTM D6335. In 3rd party testing against 9 competitive products Polaris PS-4 had less than half the deposits compared to the next closest product. No other tested products met Polaris Engineering standards for deposit cleanliness. Test measures mass of deposits in mg in high temp, high stress test cycles. Higher deposits will impact engine power and performance.

TIRE SEALANT

HOW IT WORKS

- 1 Tire sealant remains liquefied inside the tire until a leak develops in the tire or wheel.
- 2 Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug, maintaining tire pressure so you can continue your ride.

HOW MUCH DO YOU NEED?

TIRE HEIGHT (IN.) x TIRE WIDTH (IN.) / 5 = OUNCES REQUIRED PER TIRE

PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks and punctures up to .25" on standard tires and .75" on heavy ply tires
  - Helps seal the tire bead against the wheel
  - Creates permanent repair, helps maintain air pressure for the life of the tire
  - 100% water soluble for easy cleanup
  - Remains fluid and effective in temperatures down to -45° F
  - Will not rust, corrode or pit wheels
  - Easily installed through existing tire valve stem with valve core removed
