

RUN THE WATER

It's a bond like no other. One that makes you forget the troubles of the outside world. To experience the feeling of being linked to something bigger. Where you can embrace the soul inside you that longs for adventure. Whether you are searching for a moment of serenity, or a chance to dive in head first, the water will be here for you to call home. Yamaha Boats help foster that important connection and provide the foundation needed so you can truly Run The Water.

 **YAMAHA**

PRESERVING OUR FAVORITE PASTIME

Our respect for the water runs as deep as the oceans and lakes themselves. Because when we live for the water, it becomes our responsibility to protect it. That's why we believe the right thing to do should guide everything we do. Yamaha Rightwaters™ is a leading national marine sustainability program. With a focus on sustainable manufacturing practices responsible product use and marine stewardship, we are able to preserve and maintain a healthy ecosystem – one that generations from now will be able to enjoy as much as we do. Because when we feel a connection to the water, it becomes more than just our responsibility to protect it, it becomes our privilege. Find out how you can do your part by visiting yamahaboats.com/yamaha-rightwaters.

AT THE HELM OF ADVENTURE

Yamaha Boats are designed to make you feel comfortable venturing outside your comfort zone. Whether that's taking in a beautiful sunset with a pod of dolphins just off the white sand beaches of the Emerald Coast, or diving off our world-class swim platform to explore the gorgeous coral reefs and diverse marine life in the crystal-clear waters of the Florida Keys, Yamaha Boats are designed to get the most out of your time on the water. Get close to nature while cruising through the shallow waters in the narrow channels surrounded by mangroves.

Whatever body of water is calling, Yamaha Boats are built to help you get there and foster a deeper connection to everything you love above and below the surface.

MASTERING THE WATER

Yamaha Boats are equipped with unique features that enhance your experience on the water. The internal jet propulsion system, at the heart of every Yamaha Boat, delivers a compact, ultra-efficient design that opens the deck for Yamaha's spacious cockpit and signature swim platform, granting easy access to the water. Groundbreaking tech features, including the exclusive all-in-one Connex screen, put the boat's vital functions at your fingertips.

And thanks to the reliable Yamaha marine engine and a limited lifetime warranty, you'll have the peace of mind to explore the great outdoors, while creating lasting memories with family and friends year after year.

DRIVE X

A WHOLE NEW DIRECTION

Yamaha is proud to introduce the next evolution of DRiVE® technology: the world premiere of DRiVE X® exclusively on the Yamaha 27FT series. The newest innovation provides boaters with a whole new way to master the maneuverability of a Yamaha Boat, no matter your skill level. Utilizing the buttons on the steering wheel combined with dual paddles allows for an unprecedented level of maneuverability at low speeds.

- Activate the left or right buttons and the boat moves laterally to port or starboard.
- Pivot Turn functionality allows the boat to rotate on its axis.
- Dock Hold keeps the boat steady against the dock without the need for a cleat or dockline.

Featured exclusively on the 2023 275SDX.
